

# Fresh Produce

# Yamato

## Outstanding Food Safety

- Unique linear feeder pans, optimum feeding angle, and anti-stick surface allow for fast and gentle handling to avoid product damage.
- Yamato technologies reduce vibration and offer high accuracy to reduce giveaways and wastage.
- Auto-tuning function allows for automatic adjustments to achieve best results when product or environmental conditions can change.
- Polygon shaped bucket is light and rigid, improving speed and accuracy.
- Improved feeder response with feedback control ensures consistent product feed.
- Fresh and fragile product performance can be optimized by using custom options developed by Yamato, specifically for salad and fresh product applications.

## Maximum Productivity

- IP67 model helps you maintain your product sanitation standards.
- Yamato scales are designed for quick and easy cleaning.
- Ultra heavy duty load cell withstands up to 150 kg, limiting damage during rough cleaning and maintenance.
- Continuous welding improves sanitation.
- Optional tilted common bed reduces potential of standing water.

## Applications

- Salad, lettuce and salad mixes
- Fresh fruits
- Fresh vegetables
