

# Frozen Foods (IQF)

# Yamato

## Outstanding Food Safety

- IP67 model helps you maintain your production sanitation standards.
- Yamato scales are designed for below freezing environments where condensation can form on surfaces.
- Polygon shaped bucket is light and rigid, giving greater access to inside corners for easier cleaning.
- 60% less power consumption and less heat generation helps maintain product condition and limits negative environmental impact.
- Auto-inhibit feature provides clean-on-the fly and error recovery, allowing users to remove frost build-up without stopping the scale.

## Applications

- French Fries, Pizza Rolls
- Shrimp and scallops
- Most frozen food products
- Raspberries, peaches, blueberries and more
- Peas, carrots, and other mixed frozen vegetables
- Appetizers
- Ready Meals

## Outstanding Performance & Flexibility

- High speed weighing helps maintain the quality of IQF products.
- Wider product windows can reduce sealing errors and packaging waste.
- Auto-tuning functions allow automatic adjustments to achieve best results when product or environmental conditions can change.
- Improved feeder response with feedback control ensures consistent product feed.
- Blending software for complete control of individual components and total package weight.
- Single, twin or multiple point-of-discharge configurations.
